INTERNET**GOVERNANCE**PROJECT

FOUNDED IN 2004, IGP IS THE LEADING SOURCE OF INDEPENDENT ANALYSIS OF GLOBAL INTERNET GOVERNANCE.

We are a group of professors, postdoctoral researchers and students hosted at the School of Public Policy at the Georgia Institute of Technology, one of the world's leading engineering universities.

From the earliest days of Internet governance, IGP has shaped policy debates and the building of institutions. Our research and analysis is quoted in policy making fora, academic journals, and court opinions. IGP's contributors are not afraid to move outside the ivory tower to participate in IG institutions. We conduct research, produce timely policy analyses and public comments, analyze current events in Internet governance, and bring our ideas and proposals directly into Internet governance processes at the United Nations, agencies of the U.S. government and the European Commission, the Internet Corporation for Assigned Names and Numbers (ICANN), the Regional Internet Address Registries (RIRs) and other venues.

We also educate professionals and young people about Internet governance in various world regions.

CURRENT INITIATIVES

- Digital Free Trade
- Cybersecurity and Internet Governance
- ICANN and Content Regulation
- Blockchain governance

RECENT RESEARCH PAPERS

- In Search of Amoral Registrars: Content Regulation & Domain Name Policy
- Mapping the Cybersecurity Institutional Landscape
- Is Cybersecurity Eating Internet Governance?
- Digital Object Architecture and the Internet of Things
- Internet Routing Registries, Data Governance, and Security

IGP CONTRIBUTIONS TO INTERNET GOVERNANCE

2017
Multistakeholder workshop on cybersecurity and IG
Book Will the Internet Fragment? published IGP
proposals guide ICANN process on jurisdiction
Paper on Digital Object Architecture and the IoT
Paper on Domain names and content regulation

2016
Defending the IANA transition Resisting Trump's
digital protectionism Badiei elected NCUC chair

2015
Active contributions to ICANN accountability reforms

2014
IGP paper proposes divesting IANA from ICANN
NTIA transition announcement; accountability reforms
NetMundial meeting in Brazil

2013
Mueller elected to ARIN AC
Snowden revelations lead to Montevideo statement by
Internet community
Blog series on ICANN "accountability meltdown"

2012
IANA contract renewal process analyzed
First study of IPv4 transfer market
IGP aids WCIT transparency; critiques WCIT hysteria

2011
OECD Internet Policy Principles - civil society dissent
UN CIRP proposal to enter Internet Governance
New gTLD policy battles

2010
Deep packet inspection research funded by NSF
Networks and States book published
Work on routing security begins

2009
IGP leads the battle for NCSG
Growing presence in cybersecurity
Scrutiny of the Affirmation of Commitments
IGP develops first systematic critique of ICANN
accountability

2008
IGP helps shape the GNSO reforms
IGP moves into IP address policy
Assessing the ICANN-Commerce Dept JPA

2007
Work on Root signing for DNSSEC
Battles over Whois and privacy
Paper on Net neutrality
Challenging the XXX decision

2006
First Giganet Symposium
IGP calls for IANA transition, 10 years early

2005
WSIS paper on Political Oversight of ICANN
IGP challenge to US unilateral control of ICANN

2004
IGP formed to participate in WSIS
Paper analyzing IG landscape
Proposal for a Framework Convention in IG

1999
Founding of Noncommercial Domain Name Holders
Constituency; we were there

1997 - 1998
Formation of ICANN; we were there

IGP IS AT THE FOREFRONT OF INTERNET GOVERNANCE ISSUES. WE DO NOT NARRATE. WE ANALYZE, CRITIQUE AND PARTICIPATE. YOU CAN SUPPORT OUR RESEARCH AND ADVOCACY:

- Sponsor us to help sustain our analytical and evidence based research and advocacy activities.

- Subscribe to our mailing list

- Get in touch with us to present your research ideas or intern with us

- Shoot us a message to get a drink or meet if we are at the same meeting or if you are in Atlanta

Our email address is: info@internetgovernance.org
