Transition from USG/NTIA Stewardship Requires Global Public Consultation ↗

IANA FUNCTIONS

OPERATIONAL IMPLEMENTATION

ACCOUNTABILITY

FUTURE

Consultation Guiding Principles

- Transition process facilitated by ICANN to be globally inclusive and collaborative
- USG stewardship transition to accountability mechanisms (existing/new)
- Accountability mechanisms to provide transparency to all stakeholders globally (governments, private sector, civil society)
- Accountability mechanisms to be administered in a manner that is not government-led, or inter-governmental
- Accountability mechanisms to support & enhance the bottom-up consensus-based multi-stakeholder model
- Accountability mechanisms to maintain DNS security, stability, and resiliency
- Accountability mechanisms to meet needs/expectations of global customers and partners
- Mechanisms to maintain openness of Internet
